

I must extend my sincere support to the NJ Do Not Call List rules and regulations. Changing this system is not what the citizens of NJ approve nor does any commission have the right to overrule what citizens in any State under the Constitution choose.

This form of lobbying by large companies will surely backfire with regard to any chance of governmental re-election. Imagine, selling out constituents for big business? It's happening right now.

Do not over extend the use of power, it only hurts the people who support it.

Please leave the NJ Do Not Call list rules and regulations alone!
Thank you.
